Report

1.Total Number of Participants: 322337

Total Male Participants: 259370

Total Female Participants: 64051

Number of Federations: 169

Number of Participating Countries: 167

The report also includes charts that show the following:

1.Distribution of participants by age class and sex

2.The most popular age class for powerlifting is likely to be the 20-34 age class, as this is the age group with the highest number of participants.

3.The average total kilogram lifted by men is likely to be higher than the average total kilogram lifted by women.

4.The average of best three bench press kilograms ,squat kilograms and Deadlift kilograms is likely to vary by age class and sex.

5.75.25% of Male achieved first place.

Overall, the dashboard provides a comprehensive overview of participation in powerlifting competitions. It shows that the sport is more popular among men than women, but that there is a significant number of female participants. The dashboard also shows that there is a wide range of ages represented in powerlifting competitions.
